GLOWHAVEN

A fresh map, from the world data

20 regions / 82 named locations / one continuous 5:4 landscape

Purpose

Create a fresh illustrated regional map of Glowhaven using this document as the complete spatial and architectural reference. No previous map image is supplied, quoted, embedded or required. Keep the existing places and their relative anchors, while designing new coherent buildings, streets, landforms and visual treatment.

The place

Glowhaven is an independent, prosperous center of magical education and craft. One great walled city shares its territory with modest villages, working farms, western wooded hills, river country, eastern coastal settlements and offshore islands. It is a lived-in country, with many ordinary homes and workplaces between the named institutions.

The central landmark

The Evertree rises from the ground beside the northern civic precinct, behind the court approaches. Its living trunk and canopy are the main magical silhouette. The court, Sage's Spire and rootward grounds form a close group, but they are not interchangeable buildings. The portal hub is beneath the rootward structures; distant realms do not occupy extra land on this map.

Composition

Use a horizontal 5:4 canvas corresponding to five columns and four rows of square regions. North is up. The city occupies much of the upper-left and upper-middle landscape. Working harbor and shoreline open toward the eastern sea; the bottom half becomes increasingly rural. The whole map is one continuous landscape, not twenty unrelated illustrations.

What makes it large

The city must read as a major settlement containing dense blocks of ordinary roofs, several different residential textures, workshops, institutions and multiple campuses. Rural houses are the same physical size as comparable city houses. Fields, woodland, meadows, water and distance provide scale. Do not make a cottage huge simply to make it recognizable at first glance.

How to use the catalogue

All 82 current location records are included. A location can represent a neighborhood, street, river corridor, village, ship or building complex. Its internal areas are parts of that site, not additional freestanding landmarks. Some small addresses will become distinguishable only after the master is cropped and refined.

Scale comes before detail

View

A high oblique aerial view with a consistent ground-plane registration. Roofs dominate, but enough wall faces remain to distinguish buildings. Avoid a foreground panorama in which the southern cottage appears larger than a northern city block. A shallow camera, huge sky band or strong foreground enlargement defeats the requested scale.

Ordinary buildings

Proposed master-scale budget: a typical house or shop is about 0.10-0.22% of total canvas width. On a hypothetical 5000-pixel-wide composite, that is approximately 5-11 pixels. This is an art-direction example, not a promised native generation size or a real-world measurement.

Institutions

A public hall may be about 0.4-0.8% of master width; a multi-building academy precinct about 2-3%; the great arena about 1.5-2.2%. These are aggregate footprints, not a rule to enlarge every roof within a campus. Retain enough space between nearby landmarks.

The tree

A proposed Evertree canopy width of roughly 4-6% of the master keeps it exceptional without swallowing the city. Its crown and height are above-ground mass; its exact anchor refers to the ground-level base, not the top of the canopy. Its final size should be judged against the adjacent court and city, rather than fixed by pixels alone.

Rural restraint

Most countryside is landscape. A village is a small group of normal-sized roofs; an outpost is a yard and a few structures. Towers, ruins, mills and the abbey are limited accents. Large meadows and woods are intentional. Do not fill empty space with new stone circles, castles, ruins or identical decorative cabins.

Road character

City paving ends at the appropriate gates. Country routes become narrow dirt or cart tracks, with lesser paths fading into working land. Bridges reach both banks. Keep the main avenue readable, but avoid a broad paved highway cutting through all the southern plains.

Detail

Build small structures from coherent footprints, roof planes, walls and access. Do not simulate detail with noise, random greebles, melted roofs or sharpening halos. In later close crops, invent credible construction from the written role instead of reproducing blurry master-image marks.

Interpretation

Coordinates, names, area membership and described functions are data facts. Unspecified roof pitches, stone colors, timber details and minor yard arrangements are proposed visual interpretations. They may vary consistently across the new design. Do not treat those proposed finishes as newly established world lore.

The region grid and essential connections

Grid labels belong to this brief only. The finished artwork has no visible tile lines or labels. Each column is 20% of the canvas width; each row is 25% of its height.

A1 Northwest District	B1 Evertree District	C1 Harbor District	D1 Whitecrest Isles	E1 Bluecoil Reach
A2 Southwest District	B2 Artisan Quarter	C2 Southeast District	D2 Crescent Coast	E2 Moonarch Shoals
A3 Westpine Forest	B3 Pinewater Vale	C3 Greenfield Farmlands	D3 Seaward Bluffs	E3 Greenrush Marshes
A4 Southglade Woods	B4 Longgrass Meadows	C4 Sunmead Plain	D4 Brookmeadow Downs	E4 Brookmeadow Vale

City structure: connect West City Gate, East City Gate and Main City Gate with one coherent wall circuit. The exact wall outline and secondary street plan may be newly designed around the supplied anchors. Do not duplicate the city or place a separate wall around every neighborhood.

Civic route: the Main City Gate leads along the Grand Approach to Four Sages Bazaar; the Grand Ascent then climbs toward the palace forecourt. The source positions form a diagonal axis on the page. "North" in a broad street description need not mean a perfectly vertical drawn road.

Western setting: wooded ridges, an old keep, a modest hot spring and lowland water country surround the western and northwestern approaches. The mountains and forests are not densely packed with settlements. Distant northern high ground is a permissible background interpretation, not a new traversable region.

Water system: keep Pinewater as a continuous valley river corridor and give the southern settlements workable crossings. Connect the lower water country plausibly toward Greenrush Estuary on the eastern edge. Tributaries are preferable to a channel forced through buildings or climbing a bluff. The source does not specify every bend or a complete drainage survey.

Coast: Whitecrest Harbor, Pebblewick and Crescent Shores form different sections of the same settled eastern coast. Beaconrest Lighthouse is offshore. Clovermead remains boat-accessed across northern water; do not add a mainland road connection to it.

Islands: Saltmere, Driftstone Isle and the smaller isolated Wraith Island are distinct. Reefs, Moonarch Isle, Stillback Isle and the wreck add a few secondary offshore shapes. Preserve visible water gaps. Do not turn all coastal sites into one giant island or a chain of causeways.

Southern country: Longgrass Meadows and Sunmead Plain have no named location records. Keep them as substantial open grassland and pasture with only modest unnamed rural texture. Brookmeadow remains a small southeastern farming settlement; the not-yet-implemented port is not part of this brief.

Position key: master anchors are measured from LEFT and TOP. Local pins retain the source values: positive x is east; positive y is north. A pin anchors a place; it is not its complete footprint.

Copy-ready generation instruction

Give the other image-generation chat this whole PDF. The following instruction summarizes the intended first image; the catalogue supplies its detailed content.

Create one fresh, continuous illustrated regional map of Glowhaven from this brief. Use a horizontal 5:4 composition with north up. The twenty named regions form five columns and four rows; their boundaries are invisible in the finished artwork. Follow the percentage anchors in the catalogue for named locations and preserve the broad relationships between coast, islands, city, hills, rivers, villages and open country.

Glowhaven is a great walled magical city in a larger working landscape. Fill the city with dense, human-scale roof groups and varied residential, civic and craft districts. Place the rooted Evertree behind the northern court precinct as the principal magical landmark. Keep the court, its office tower and residential manor distinct. Arrange the main gate, great avenue, founders' market and palace stair as one connected civic route. Include the four separate academy campuses, with red, cyan, violet and gold identifying details, plus the great arena and working harbor.

Buildings must be tiny relative to the complete territory. A rural house is not larger than a comparable city house. Most minor shops need only a logical frontage within a city block at this stage. Do not enlarge every named location into a showcase monument. Keep modest villages, fields, thin dirt roads, western woods and broad southern meadows. Use the eastern sea for genuinely separated inhabited islands, a small prison island, a lighthouse rock, low reefs, a broken-arch isle, a wreck and an anchored sailing ship.

Use richly colored 2D fantasy environment illustration with controlled painterly light, deliberate contours, clear roof planes and consistent aerial perspective. Choose a fresh architectural interpretation within the written world facts. Build terrain as connected ridges, valleys, banks and grouped tree masses. Keep water quiet enough to read the coast. Show a world with practical work and ordinary life, not a display of equally enormous castles. Do not add random ruins or giant decorative statues to fill empty ground.

This is a master composition for later cropped refinement. Design legible silhouettes and believable tiny footprints now; do not make low-resolution texture sacred. Small roofs, yards and structural details can be reconstructed intelligently in later close crops. Preserve the placement, scale, access and identity of each site when refining it.

Deliver clean map artwork only. Do not print this document's names, numbers, coordinate grid, labels, pins, borders, UI, captions or legend. Do not draw indoor rooms as exterior destinations. Other realms and Shadowspire's private realm are not extra islands in Glowhaven. The reef and turtle habitats can be shown without fixing their residents into the background; any optional creature sighting must remain small and secondary. The kraken is mobile, not a new fixed fortress or island. Read the regional catalogue before deciding the final composition.

Complete regional catalogue

Read the location identity and scale notes together. "Parts" lists the actual authored areas for recognition; these are grouped rooms, yards or terrain stretches, not separate map buildings. Exterior descriptions translate current functions into drawable forms. Finishes absent from the source are design suggestions.

A1 | Northwest District

Master window: x 0-20%, y 0-25% | 6 named locations

Green western ridges descend toward the northwestern city wall. Greywatch Keep and the Emberfox pools overlook roads leading to Phoenix Wing and the upper residential streets. The maintained approaches are busy; wooded slopes beyond them grow quieter.

GH01 The Winding Lowlands

Landscape settlement | Master (13.8% across, 13.0% down) | Local (19, -2)

Position: on the eastern side of this region.

A broad low-lying landscape of winding channels, lake edges, scattered homesteads and one very small inhabited settlement. Include a modest green, winding lane, landing and simple crossing as parts of the same lowland scene.

This pin represents a landscape and its tiny settlement, not one oversized building. Preserve a water-linked approach and generous open ground.

Parts of this one site: Lowland Landing; Winding Lane; Small Town Green; River Crossing; Lake Shore.

GH02 Greywatch Keep

Small ruin | Master (3.8% across, 17.8% down) | Local (-31, -21)

Position: in the southwestern part of this region.

A broken gate and weathered defensive walls surround an overgrown yard, with roofless stone rooms and a damaged upper rampart. It is an obsolete founding-era fort above the western approaches.

A compact historic ruin, smaller than an academy campus. No functioning garrison, new military town or invented giant dungeon.

Parts of this one site: Broken Gate; Overgrown Yard; Keep Interior; Upper Walk.

GH03 Moonwhisker Emporium

Shop | Master (17.0% across, 19.5% down) | Local (35, -28)

Position: in the southeastern part of this region.

A modest city pet-and-companion shop with a practical storefront. Suggest its identity through small carriers, a sheltered entry or an enclosed service yard; the actual perches and feed bins are inside.

One shop footprint among surrounding roofs. Do not render giant cages, loose legendary animals or a whole zoo.

Parts of this one site: Showroom; Care Counter; Back Room.

GH04 Stargarden Manor

Estate | Master (19.6% across, 19.5% down) | Local (48, -28)

Position: in the southeastern part of this region.

The Great Sage's private residence, approached through a quiet front garden. A composed house, reception side, private residential wing and secluded rear garden distinguish domestic life from civic government.

A separate residence from the Grand Sage's Court and Sage's Spire. Its near-boundary pin places it close to the civic district, not in a remote estate province.

Parts of this one site: Front Garden; Entrance Hall; Reception Room; Private Wing; Private Garden.

GH05 The Emberfox Hot Spring

Rural building | Master (5.8% across, 23.2% down) | Local (-21, -43)

Position: in the southwestern part of this region.

A modest bathing house beside warm outdoor pools on the western outskirts. Let rock, vegetation and a faint trace of steam establish the retreat; ordinary timber construction suits its rural setting.

The bathing house must remain comparable to other small buildings. Do not turn the pools into an enormous palace or volcanic crater.

Parts of this one site: Bathhouse Entry; Main Pool; Garden Pool.

GH06 Phoenix Wing Academy

Campus | Master (15.0% across, 23.2% down) | Local (25, -43)

Position: in the southeastern part of this region.

A compact academy precinct marked by red pennants, connected teaching wings, a broad arrival court and open practice grounds. Distinguish the training yard and small practice arena from the city's great public colosseum.

Dining, dormitories, faculty offices, commons and music room belong to this one campus. Use a few coordinated roofs around courts rather than eleven independent landmarks.

Parts of this one site: Arrival Court; Main Hall; Lecture Hall; Training Yard; Practice Arena; Student Commons; Dining Hall; Faculty Offices; Dormitory Wing; Sun Terrace; Music Room.

B1 | Evertree District

Master window: x 20-40%, y 0-25% | 13 named locations

The Evertree rises above pale civic buildings, gardens and the northern residential quarter. Broad approaches connect the court, the Cloud District and the great avenue below. Public streets and controlled palace rooms have different access.

GH07 Evertree Base

Primary landmark | Master (24.6% across, 14.3% down) | Local (-27, -7)

Position: on the western side of this region.

One immense living tree rises directly from the ground beside and behind the court precinct. Show a rooted trunk, a coherent canopy and palace-adjacent approaches; the rootward courtyard belongs beneath it.

The tree is the single dominant magical landmark, with a limited canopy that does not swallow the city. The vaulted Portal Room is below the rootward structures, not a second outdoor portal monument.

Parts of this one site: Rear Palace Walk; Rootward Court; Evertree Foot; Portal Room.

GH08 Sage's Spire

Secondary tower | Master (27.6% across, 14.3% down) | Local (-12, -7)

Position: near the center of this region.

The Great Sage's working tower and office beside the court and Evertree grounds. Give it a clear vertical silhouette and a plausible stair-and-office volume, separated from the living tree.

This is an office tower, not the Evertree itself and not the Great Sage's private manor. Let it support the main skyline rather than compete with it.

Parts of this one site: Spire Entrance; Office Landing; Great Sage's Office; Records Room; Meeting Room.

GH09 The Grand Sage's Court

Major complex | Master (25.8% across, 16.0% down) | Local (-21, -14)

Position: on the western side of this region.

A civic palace precinct with a formal forecourt facing the ascending avenue, public galleries and office wings. Evertree grounds lie behind it. A compact observatory can rise above the offices, subordinate to the tree.

Government, council and audience rooms are inside this complex. Keep the court, nearby tower office and tree base distinct but physically coherent.

Parts of this one site: Palace Forecourt; Audience Hall; Council Chamber; Administrative Wing; Public Gallery; Oracle's Observatory.

GH10 Briarcrest Manor

Estate | Master (39.8% across, 18.0% down) | Local (49, -22)

Position: in the southeastern part of this region.

A substantial residential manor with an entrance walk, formal reception side and garden grounds. Its clear garden boundary separates it from the adjoining upper-city roofs.

One residence and its grounds; its for-sale status does not need signage on the map. Keep its scale below the civic palace.

Parts of this one site: Front Walk; Entrance Hall; Reception Rooms; Garden Walk.

GH11 The Gilded Griffin

Shop | Master (36.8% across, 18.5% down) | Local (34, -24)

Position: in the southeastern part of this region.

A fine jewelry shop with a polished, restrained frontage and a formal entrance. Its display salon and fitting desk occupy the interior.

A small high-quality commercial building, not a gilded castle or giant griffin statue.

Parts of this one site: Display Salon; Fitting Desk; Front Vestibule.

GH12 Cloud District

Neighborhood | Master (32.6% across, 19.2% down) | Local (13, -27)

Position: on the southern side of this region.

An upper civic residential neighborhood of fine homes, polished streets, garden squares and terraced lanes around the court. The defining quality is an ensemble of orderly residences, not a cloud platform.

Spread ordinary houses across a district-sized patch. It is neither a separate city nor a floating island.

Parts of this one site: Courtward Street; Terrace Lane; Garden Square.

GH13 The Magistrate's Hall

Civic hall | Master (23.8% across, 20.0% down) | Local (-31, -30)

Position: in the southwestern part of this region.

A substantial but practical civic hall with tall windows, a public vestibule and a clear public approach. Records and hearing rooms sit behind the frontage.

One civic building with several internal rooms; use an orderly street-facing silhouette rather than a fortress or prison.

Parts of this one site: Public Vestibule; Records Counter; Hearing Chamber; Waiting Gallery; Records Room.

GH14 Rune and Raven's

Shop | Master (21.4% across, 20.8% down) | Local (-43, -33)

Position: in the southwestern part of this region.

A magical-accessory and focus shop with a tidy public frontage and a working bench deeper inside. Glass display bays and a discreet workshop addition provide its commercial identity.

One compact shop. Do not scale its sample focuses into giant rooftop artifacts.

Parts of this one site: Accessory Gallery; Consultation Counter; Back Stock.

GH15 House Goldbarrow Estate

Estate | Master (37.0% across, 21.0% down) | Local (35, -34)

Position: in the southeastern part of this region.

A noble residence set behind a gate and formal front gardens, with private grounds and a residence hall. Its enclosed garden footprint gives it more breathing room than ordinary city housing.

A household estate, not a second governing palace. The name does not require gold-covered buildings.

Parts of this one site: Estate Gate; Front Gardens; Residence Hall; Private Grounds.

GH16 The Grand Ascent

Street structure | Master (28.4% across, 21.5% down) | Local (-8, -36)

Position: on the southern side of this region.

A monumental stair avenue climbs from the bazaar toward the palace forecourt. Broad intermediate landings provide views and a convincing change in elevation.

An exposed circulation feature, not another palace. Its pin lies on the court-bazaar axis; its full route spans beyond the point marker.

Parts of this one site: Bazaar Foot; Lower Flight; Middle Landing; Upper Flight; Bazaar Landing; Palace Landing.

GH17 The Arcane Emporium

Commercial hall | Master (25.2% across, 22.0% down) | Local (-24, -38)

Position: in the southwestern part of this region.

The city's largest and fanciest magic shop. A grand entrance and broader gallery volume distinguish it from the smaller commercial premises nearby.

A large shop within the urban grain. Curated rooms and consultation salons do not become separate freestanding towers.

Parts of this one site: Grand Entrance; Grand Gallery; Curated Rooms; Consultation Salon.

GH18 Bramble & Bottle

Shop | Master (33.8% across, 22.0% down) | Local (19, -38)

Position: in the southeastern part of this region.

A potion shop fitted into a city block. A small glazed storefront or sheltered display entrance can suggest a bottle gallery, with the preparation workroom behind.

One compact premises. Optional bottle-colored accents are a visual interpretation, not a required roof color or new landmark.

Parts of this one site: Bottle Gallery; Consultation Counter; Preparation Room.

GH19 The Wandering Quill

Shop | Master (31.8% across, 22.5% down) | Local (9, -40)

Position: on the southern side of this region.

A small stationery shop within the civic-commercial streets. A narrow frontage, neat entrance and attached roof can imply paper and ink trade without readable text.

Draw as one ordinary shop, with stock and counter inside. Its neighboring streets matter more than a giant quill emblem.

Parts of this one site: Paper and Ink Floor; Stock Alcove; Front Counter.

C1 | Harbor District

Master window: x 40-60%, y 0-25% | 6 named locations

Northern shore roads meet the working waterfront and Hydra Head Academy. Cargo sheds, homes, gardens and coastal farms share the approaches to Whitecrest Harbor. Beaconrest Lighthouse marks the offshore channel.

GH20 Clovermead

Village | Master (54.8% across, 9.5% down) | Local (24, 12)

Position: on the eastern side of this region.

A small northern farming settlement with a few houses scattered among broad cultivated fields. A waterside landing and intervening water explain why people reach it by boat.

Do not connect it to the city with a new ordinary road bridge. Keep its houses as small as comparable city homes.

Parts of this one site: Boat Landing; Farm Lane; Farmstead Green; Meadow Fields.

GH21 Pinewake Coast

Landscape | Master (45.4% across, 13.0% down) | Local (-23, -2)

Position: on the western side of this region.

A northern coastal strip where pines reach the shore. Include a dry upper path, small headland, tide pools and uneven exposed rock shelves.

Let the terrain carry this location. It does not need a new village, lighthouse or castle.

Parts of this one site: Pineward Beach; Tide Pools; Pine Headland.

GH22 Beaconrest Lighthouse

Small tower | Master (58.4% across, 15.0% down) | Local (42, -10)

Position: on the eastern side of this region.

A red-capped working lighthouse stands on a small offshore rock with a low supply jetty and attached keeper's quarters. Its signal balcony and lantern room give it a readable profile.

It is a slender navigation marker, not a tower the size of the city arena. Keep it detached from the mainland by a water channel.

Parts of this one site: Supply Jetty; Keeper’s Kitchen; Lantern Room; Signal Balcony.

GH23 Rosetimber Suburbs

Neighborhood | Master (45.8% across, 19.5% down) | Local (-21, -28)

Position: in the southwestern part of this region.

A pleasant, prosperous residential neighborhood adjoining the Cloud District. Set individual homes among maintained gardens and controlled lanes, below the grandeur of the noble estates.

An inhabited neighborhood, not one manor or another walled town. Its boundary with nearby residential districts may be gradual.

Parts of this one site: Rosetimber Avenue; Garden Court; Residents' Pavilion.

GH24 Whitecrest Harbor

Waterfront | Master (53.2% across, 20.8% down) | Local (16, -33)

Position: on the southern side of this region.

A working waterfront of cargo steps, quays, sheds, loading space and passenger access, with moored craft scaled to the buildings. Shore roads and city lanes meet the quay network.

Draw an operational harbor district rather than one giant building or a forest of oversized masts. Keep navigable channels open toward the islands.

Parts of this one site: Harbor Quay; Cargo Pier; Passenger Landing; Harbor Office.

GH25 Hydra Head Academy

Campus | Master (44.2% across, 22.7% down) | Local (-29, -41)

Position: in the southwestern part of this region.

A garden-oriented academy precinct with violet awnings, a welcoming court and connected halls arranged around group-work spaces. Landscaped walks and a pavilion make its exterior distinct.

Keep the indoor practice hall, lecture rooms, dormitories and dining facilities within the campus. It is not an enormous botanical country estate.

Parts of this one site: Arrival Court; Confluence Hall; Seminar Room; Practice Hall; Garden Walk; Student Commons; Dining Hall; Faculty Offices; Dormitory Wing; Lecture Hall; Confluence Pavilion.

D1 | Whitecrest Isles

Master window: x 60-80%, y 0-25% | 3 named locations

Rocky islands and sheltered channels lie beyond the harbor. Saltmere and Driftstone support ordinary island households, while the isolated skull-shaped Wraith Island receives controlled prison traffic. Weather and working boats shape everyday journeys.

GH26 Wraith Island

Prison island | Master (64.0% across, 5.8% down) | Local (-30, 27)

Position: in the northwestern part of this region.

A small, isolated skull-shaped rocky island receives controlled supply boats at Skullshore Landing. A compact prison approach can be visible, subordinate to the rock's outline.

Keep the island small and distinct from the inhabited islands. The separate playable prison realm is not another island to duplicate on this map.

Parts of this one site: Skullshore Landing; Skull Rock Ledge; Island Track.

GH27 Driftstone Isle

Inhabited island | Master (73.8% across, 12.5% down) | Local (19, 0)

Position: on the eastern side of this region.

A rocky offshore island with a small resident community, modest homes and a water-facing landing. Ordinary island life is the defining feature.

A separate inhabited island from Saltmere; avoid a second prison, giant ruin or duplicate skull rock.

Parts of this one site: Island Landing; Village Lane; Village Green; Rocky Shore.

GH28 Saltmere

Island village | Master (63.6% across, 17.2% down) | Local (-32, -19)

Position: in the southwestern part of this region.

A small inhabited island village: compact houses cluster near a working shore and landing, with enough rocky ground to read as its own island.

Separate it from Driftstone Isle and Wraith Island. It must not disappear into the harbor mainland.

Parts of this one site: Village Landing; Village Lane; Shoreline Green.

E1 | Bluecoil Reach

Master window: x 80-100%, y 0-25% | 2 named locations

Open blue water surrounds distant reefs, the Gilded Albatross anchorage and an isolated serpent resting place. Sailors distinguish ordinary coastal passages from the waters around a sleeping great beast. Sudden swells and scarce landing places reward preparation.

GH29 Bluecoil Rest

Reef habitat | Master (91.4% across, 9.2% down) | Local (7, 13)

Position: near the center of this region.

A remote reef with inner ledges, clear surrounding water, a narrow wash shore and an outlying mooring rock. The inner rocks form the fixed resting habitat of the great blue serpent Nerathyl.

The reef is the durable landmark. If the serpent is shown, keep it a secondary sleeping coil at believable map scale; do not create a giant monster island or imply multiple serpents.

Parts of this one site: Distant Mooring; Scale Shore; Serpent Ledge.

GH30 The Gilded Albatross

Ship | Master (83.4% across, 21.2% down) | Local (-33, -35)

Position: in the southwestern part of this region.

An ornate but hard-used sailing ship at a charted anchorage, with a main working deck, raised quarterdeck and visible rigging. Salvage equipment and practical crew circulation matter more than pristine decoration.

A ship, never an island or town. Its galley, hold and cabins are below or within the same hull. Crew and captain are not giant portrait figures on the map.

Parts of this one site: Boarding Landing; Main Deck; Quarterdeck; Galley; Salvage Hold; Crew Passage.

A2 | Southwest District

Master window: x 0-20%, y 25-50% | 7 named locations

Western gates, Gryffin Tail and closely fitted residential streets occupy the southwestern city. Rougher Greyfield housing gathers outside the southern walls, beyond which the land rises into pines. Maintained streets remain ordinary civic ground.

GH31 West City Gate

Gate | Master (7.8% across, 28.0% down) | Local (-11, 38)

Position: on the northern side of this region.

A guarded western arch connects city paving to the wilderness and caravan road. Its masonry and adjoining wall establish the city's western threshold.

Attach it to the main city wall. It is not an independent castle or another town.

Parts of this one site: City Arch; Guard Room; Outer Road; Westward Track.

GH32 Wayfarer's Goods

Shop | Master (19.4% across, 29.2% down) | Local (47, 33)

Position: in the northeastern part of this region.

A practical travel-supply shop among western city streets, with a modest loading edge and a functional frontage for road equipment.

One city shop. Tents, packs and counters remain tiny details, not a new caravan village.

Parts of this one site: Travel Gear Floor; Packing Counter; Supply Room.

GH33 The Golden Ladle

Shop or eatery | Master (18.8% across, 32.2% down) | Local (44, 21)

Position: in the northeastern part of this region.

A dependable working-neighborhood eatery with a modest street entrance, kitchen volume and a practical service edge. Its place among craftspeople should be clear from the adjacent streets.

An ordinary urban premises, not a standalone grand banquet hall. Tables and food belong inside or in a tiny yard.

Parts of this one site: Main Hall; Bar; Workers' Room; Kitchen Passage.

GH34 West Glowhaven Woods

Woodland | Master (2.4% across, 34.2% down) | Local (-38, 13)

Position: on the western side of this region.

Shaded woodland outside the western wall, with a maintained outer track, deeper clearing and denser animal cover. Keep a visible difference between the accessible fringe and interior thickets.

No obligatory monster icons or new fort. This is woodland, not a second settlement.

Parts of this one site: Woodland Edge; Pine Track; Clearing.

GH35 Gryffin Tail Academy

Campus | Master (15.2% across, 34.8% down) | Local (26, 11)

Position: on the eastern side of this region.

A cyan-bannered academy with an entrance square, orderly lecture wings, research rooms and a sheltered reading garden. A small training court adds a different outdoor shape to the academic buildings.

Seminar rooms, dining, dormitories and game rooms are parts of one campus. Academic calm need not mean bare or featureless architecture.

Parts of this one site: Arrival Steps; Lecture Wing; Lecture Hall; Seminar Room; Research Rooms; Reading Garden; Dining Hall; Faculty Offices; Dormitory Wing; Training Court; Puzzle Parlor.

GH36 West Greyfield

Poor neighborhood | Master (15.8% across, 43.8% down) | Local (29, -25)

Position: in the southeastern part of this region.

The western half of the poor settlement outside the southern walls: patched roofs, close-built modest homes and rough lanes. Its texture is less orderly and less affluent than the city inside.

It continues toward East Greyfield. Keep it inhabited and extensive enough to be a neighborhood, rather than a single ruin or isolated shack.

Parts of this one site: West Lane; Common Yard; Outer Track.

GH37 Hermit's hut

Rural hut | Master (4.8% across, 50.0% down) | Local (-26, -50)

Position: in the southwestern part of this region.

A very small dwelling on a wooded ridge beyond the southwestern city approaches, reached by an uneven footpath. Sparse construction and surrounding woodland make it feel removed from city life.

The pin sits exactly on a region boundary. Draw one hut, with the path and vegetation continuing naturally across the tile edge.

Parts of this one site: Mountain Trail; Hut Clearing; Hut Interior.

B2 | Artisan Quarter

Master window: x 20-40%, y 25-50% | 16 named locations

Founders' arcades, workshops, inns and the Crucible fill the central southern wards. Timber carts and students share the streets with shoppers and craftspeople. The lower wall separates working neighborhoods from the patched roofs of Greyfield.

GH38 City Guard Headquarters

Civic hall | Master (26.0% across, 27.0% down) | Local (-20, 42)

Position: in the northwestern part of this region.

A practical city-guard headquarters with a public reporting frontage and an adjoining briefing or drill yard. Keep controlled service access distinct from ordinary public streets.

One civic compound in the working city, not a massive prison fortress. Wraith Island remains separate.

Parts of this one site: Public Entry; Briefing Room; Records Office; Guard Yard.

GH39 The Farmer's Exchange

Market hall or yard | Master (34.4% across, 27.0% down) | Local (22, 42)

Position: in the northeastern part of this region.

A produce-trading place with scales, cart access, a covered trading edge and practical loading room. It connects rural goods to the central city markets.

Use a compact working yard or market-hall footprint. Nearby ordinary shops should not all become farm buildings.

Parts of this one site: Market Stalls; Trading Walk; Produce Court.

GH40 The Eternal Crucible

Major arena | Master (39.4% across, 27.0% down) | Local (47, 42)

Position: in the northeastern part of this region.

A great public arena with a central competition floor, steep tiered stands and a ring-shaped concourse. Entrances and supporting practice or medical spaces sit around its perimeter.

One arena complex. Pillar, planted, ice, stair and shallow-water bout layouts are alternative arrangements of its fighting spaces, not five additional colosseums.

Parts of this one site: Arena Floor; Grand Stands; Concourse; Competitor Passage; Competitor Lounge; Infirmary; Practice Gallery; Pillar Court; Verdant Ring; Frostglass Platform; Broken Stair Arena; Mirrorwater Garden.

GH41 Four Sages Bazaar

Primary civic space | Master (32.2% across, 28.5% down) | Local (11, 36)

Position: on the northern side of this region.

A civic market square centers on one fountain and the founders' monument, framed by north, east, south and west arcades. The monument commemorates four founding archmages.

Use a small four-figure sculptural group as a proposed visual reading of the monument. Keep it one shared fountain, not four remote plazas or four giant towers.

Parts of this one site: Four Sages Fountain; North Arcade; East Arcade; South Arcade; West Arcade.

GH42 Merchant's Row

Commercial street | Master (38.8% across, 29.0% down) | Local (44, 34)

Position: in the northeastern part of this region.

A continuous eastward extension of the bazaar's commercial streets, lined with shopfronts, awnings and busy pedestrian approaches.

Render as a street ensemble rather than one monumental market building. Use small roof masses and a clear walkable lane.

Parts of this one site: East Shopfronts; Covered Walk; Crossing Lane; Merchant's Row Bench Workshop.

GH43 Violet Thread

Shop | Master (28.4% across, 31.8% down) | Local (-8, 23)

Position: on the northern side of this region.

A compact tailor's shop with a fitting-room frontage and space for alterations behind it. Cloth-colored awnings or hanging textiles can distinguish it subtly.

One ordinary storefront; the shop name does not require an entirely violet building.

Parts of this one site: Clothing Floor; Fitting Alcove; Front Counter.

GH44 The Everlight Public Library

Civic hall | Master (24.2% across, 32.2% down) | Local (-29, 21)

Position: in the northwestern part of this region.

A public library with an orderly reading-hall volume, broad windows and a practical street entrance. Smaller offices and shelves sit within the main building.

A notable civic hall but much smaller than an academy precinct. No additional university campus is implied.

Parts of this one site: Reading Hall; Stacks; Reference Desk.

GH45 Adventurer's Guild - Glowhaven Branch

Public hall | Master (39.0% across, 32.2% down) | Local (45, 21)

Position: in the northeastern part of this region.

A welcoming timber-and-stone guild hall with honey-colored beams, warm geometric stained glass and a controlled rear practice yard. A broad public entrance serves adventurers and clients.

The reception, request boards, common tables, appraisal bench and offices are inside one hall. It is neither an inn nor a second arena.

Parts of this one site: Reception Counter; Request Board; Common Hall; Appraisal Bench; Briefing Room; Training Yard; Staff Office.

GH46 The Perfumed Rose

Shop | Master (31.4% across, 32.8% down) | Local (7, 19)

Position: on the northern side of this region.

A small perfumery and household-alchemy shop with a sheltered sample counter or glazed frontage and a preparation space behind.

Refined but compact. Do not grow an enormous rose garden or distillery around the name alone.

Parts of this one site: Scent Gallery; Mixing Counter; Front Desk.

GH47 Roseberry Inn

Inn | Master (27.8% across, 34.8% down) | Local (-11, 11)

Position: near the center of this region.

A lived-in city inn with a substantial common-room volume, upper lodging rooms and a modest service yard. Warm windows and an ordinary street-facing entrance suit its function.

A small-to-medium urban building, not a resort estate. Bunks and private rooms are inside the same premises.

Parts of this one site: Front Desk; Common Room; Dining Room; Guest Stair; Kitchen Passage; Roseberry Attic Room; Cellar.

GH48 The Carpenter's Measure

Workshop | Master (20.8% across, 37.0% down) | Local (-46, 2)

Position: on the western side of this region.

A city carpentry shop with a long practical workroom, stacked-timber service edge and ordinary street-facing entrance.

Keep lumber piles and workbenches as secondary yard details. It is not a rural logging camp.

Parts of this one site: Timber Yard; Joinery Floor; Design Bench.

GH49 The Grand Approach

Street structure | Master (37.4% across, 37.0% down) | Local (37, 2)

Position: on the eastern side of this region.

A broad straight avenue runs from the Main City Gate toward Four Sages Bazaar. Its clear sightline and connected frontage make it one of the city's main organizing routes.

Treat the pin as a point along a linear avenue. Its full extent joins the two named endpoints rather than ending at the marker.

Parts of this one site: South Approach; Central Walk; Bazaar Forecourt; Gateward Plaza; Market Steps.

GH50 The Silver Anvil

Workshop | Master (24.4% across, 37.5% down) | Local (-28, 0)

Position: on the western side of this region.

A metalworking and finishing shop with a more formal consultation frontage and a workroom behind. Practical commissioning distinguishes it from a simple weapon stall.

A separate workshop from Blackstone Smithy, of comparable ordinary scale. Avoid an enormous freestanding anvil icon.

Parts of this one site: Showroom; Workroom; Consultation Desk.

GH51 Blackstone Smithy

Workshop | Master (28.4% across, 38.2% down) | Local (-8, -3)

Position: near the center of this region.

A functional smithy with a forge chimney, working yard and practical counter or street entrance. Separate the hot workshop volume from the public edge.

Small craft premises within the urban grain. Forge glow is a subtle accent, not a volcano or factory district the size of the city.

Parts of this one site: Front Counter; Forge Floor; Tool Wall.

GH52 Hide & Hammer

Workshop | Master (24.8% across, 41.5% down) | Local (-26, -16)

Position: on the western side of this region.

A leatherworks shop combining a public display frontage with cutting and finishing space behind it. A small drying or service courtyard is a reasonable exterior interpretation.

One working-city building. Do not infer a slaughterhouse or a large tannery landscape from the name.

Parts of this one site: Goods Display; Leather Bench; Stock Room.

GH53 East Greyfield

Poor neighborhood | Master (35.4% across, 47.2% down) | Local (27, -39)

Position: in the southeastern part of this region.

The eastern continuation of Greyfield outside the southern wall. Narrow lanes and close-set, worn homes show limited means without turning the district into deserted rubble.

Join it visually to West Greyfield while retaining local street variation. Neither half is a separate distant village.

Parts of this one site: East Lane; Shared Court; South Edge.

C2 | Southeast District

Master window: x 40-60%, y 25-50% | 9 named locations

Dragon Hoard, the eastern residential wards and the south gate overlook shore roads and neighboring farms. Commercial lanes connect the central city with Pebblewick and the coast. Workshops and quiet homes continue between the larger landmarks.

GH54 Crooked Tankard

Inn or tavern | Master (43.6% across, 26.8% down) | Local (-32, 43)

Position: in the northwestern part of this region.

A city taproom with a convivial common-room frontage, hearth chimney and practical entrance from the street.

One tavern among the surrounding houses. Do not turn its whole block into an enormous tankard-shaped building.

Parts of this one site: Taproom; Hearth Corner; Side Room; Kitchen Passage.

GH55 East City Gate

Gate | Master (55.4% across, 27.0% down) | Local (27, 42)

Position: in the northeastern part of this region.

A guarded eastern arch links the walled city with the working shore and harbor-side approaches. Connect its road to the coastal network.

One gate in the same wall circuit as the West and Main gates, not a separate border fortress.

Parts of this one site: City Arch; Harbor Road; Gatehouse; Shoreward Track.

GH56 Eastbloom Residences

Neighborhood | Master (54.0% across, 30.2% down) | Local (20, 29)

Position: in the northeastern part of this region.

Middle-class homes near Dragon Hoard Academy, slightly more polished and orderly than average city housing. Maintained small gardens and controlled lanes express its character.

Use a neighborhood of human-scale houses, not one vast luxury palace or an additional town wall.

Parts of this one site: Eastbloom Lane; Garden Walk; Residents' Green.

GH57 The Compassmaker

Workshop | Master (45.2% across, 31.2% down) | Local (-24, 25)

Position: in the northwestern part of this region.

A small city instrument workshop with a precise, practical storefront and repair benches behind it. Fine metalwork and window light can suggest its craft.

One modest shop. The compasses are interior objects and should not become a huge compass rose on the ground.

Parts of this one site: Trinket Floor; Work Bench; Parts Cabinet.

GH58 Willowbend Residential District

Neighborhood | Master (42.0% across, 34.2% down) | Local (-40, 13)

Position: on the western side of this region.

A middle- and working-class neighborhood of ordinary homes, shared lanes and everyday services. Roof spacing and small courtyards distinguish blocks without making every home unique at master scale.

A broad lived-in housing patch, not a single named house. Use a quieter material vocabulary than the court estates.

Parts of this one site: Willowbend Lane; Courtyard Row; Neighborhood Green; Willowbend Courtyard Cottage.

GH59 Dragon Hoard Academy

Campus | Master (51.8% across, 34.2% down) | Local (9, 13)

Position: near the center of this region.

A yellow-and-gold academy precinct with a high entrance gallery, exhibition and laboratory wings, training court and a modest roof-level observatory.

Keep academic displays within the galleries and one coherent campus. The name does not imply a dragon skeleton, dragon lair or treasure mountain.

Parts of this one site: Arrival Gallery; Exhibition Hall; Discovery Labs; Observatory; Lecture Studio; Student Commons; Dining Hall; Faculty Offices; Dormitory Wing; Training Court; Lecture Hall.

GH60 The Jade Cup Teahouse

Shop or eatery | Master (43.8% across, 38.0% down) | Local (-31, -2)

Position: on the western side of this region.

A calm city teahouse with an inviting small entrance and a quieter interior arrangement. A tiny courtyard is a permissible visual interpretation if room allows.

Keep it in the city streets. Its name alone does not prescribe foreign monumental architecture or a vast tea estate.

Parts of this one site: Tea Room; Garden Alcove; Service Counter.

GH61 Pebblewick

Coastal town | Master (58.4% across, 39.0% down) | Local (42, -6)

Position: on the eastern side of this region.

A small coastal town outside the eastern walls, with modest homes, local lanes and access to the water. It provides the inhabited setting for Seabreeze Inn just across the region edge.

Distinct from southwestern Pebbletown and southeastern Brookmeadow. Keep the shore settlement visible but much smaller than Glowhaven City.

Parts of this one site: Shore Road; Pebblewick Green; Village Lane; Boat Landing.

GH62 Main City Gate

Gate | Master (42.0% across, 44.5% down) | Local (-40, -28)

Position: in the southwestern part of this region.

The largest city gate anchors the southern threshold and the start of the great avenue. Give it a broad passable arch, flanking defensive masonry and a clear road out to Greyfield and the farms.

Its silhouette is larger than the other gates, but attached to the same city wall. This pin is the main gate's ground entrance.

Parts of this one site: South Arch; Gate Square; Watch Rooms; South Road.

D2 | Crescent Coast

Master window: x 60-80%, y 25-50% | 3 named locations

Curved beaches and small rocky islands follow the coast south of Whitecrest. Inns, fishers and visiting boats use the sheltered inshore water. Exposed reefs require care even when the nearby beaches are peaceful.

GH63 Seabreeze Inn

Inn | Master (61.8% across, 38.2% down) | Local (-41, -3)

Position: on the western side of this region.

A small coastal inn in Pebblewick, with lodging above or behind a public eating room and a straightforward approach from the shore lanes.

Its pin is in the neighboring coast region but belongs to the same settlement as Pebblewick. Do not create a second town to contain the inn.

Parts of this one site: Reception; Common Room; Dining Room; Guest Landing; Kitchen Door.

GH64 Crescent Shores

Coast | Master (61.2% across, 43.5% down) | Local (-44, -24)

Position: in the southwestern part of this region.

A curved stretch of eastern beaches with dunes, sheltered coves and a visible dry shore route. Leave uninterrupted sand and water between the few settlements.

A coastline feature, not another village. The Crescent Shores pin is only an anchor within a longer beach.

Parts of this one site: Crescent Beach; Dune Path; Sheltered Cove; Coastal Bluff.

GH65 Gullwatch Reefs

Reef habitat | Master (75.0% across, 43.5% down) | Local (25, -24)

Position: in the southeastern part of this region.

Low exposed reefs, tidal pools and seabird nesting rocks sit off the eastern shore. Narrow usable channels separate the rock groups.

No large buildings or castles. Use water clarity, pale rock and a few tiny birds rather than a giant gull emblem.

Parts of this one site: Boat Shelf; Tide Pools; Gull Ledges.

E2 | Moonarch Shoals

Master window: x 80-100%, y 25-50% | 3 named locations

Broken island stonework, a stranded wreck and broad shell-shaped rocks interrupt the eastern sea. Fishers know usable approaches and signs of larger creatures passing beneath them. The wreck waters are considerably less forgiving than the sheltered island coves.

GH66 Splinterwake Wreck

Wreck | Master (92.6% across, 28.7% down) | Local (13, 35)

Position: on the northern side of this region.

A broken merchant hull lies caught among sharp eastern rocks. Low water reveals portions of its deck and cargo spaces, with deep water nearby.

A grounded wreck at ship scale, not an intact enormous warship. The mobile kraken has no permanently occupied building or fixed nest here.

Parts of this one site: Outer Anchorage; Broken Deck; Flooded Hold; Deepwater Edge.

GH67 Moonarch Isle

Small ruin island | Master (86.0% across, 37.5% down) | Local (-20, 0)

Position: on the western side of this region.

A small rocky island holds a weathered stone arch, low foundations, salt-resistant plants and fragments of paving above a pebble landing.

The arch is an inert ruin. Keep it smaller than inhabited islands and do not depict an active portal beam or a whole ruined metropolis.

Parts of this one site: Pebble Landing; Broken Arch; Tide Crypt; Offshore Drop.

GH68 Stillback Isle

Island habitat | Master (93.2% across, 47.2% down) | Local (16, -39)

Position: on the southern side of this region.

A sheltered low-rock island has a small beach, nesting shelf and the resting place of Mauruun, the enormous passive turtle. Weathered shell plates can resemble a low living rise.

Its habitat remains the durable site. If the turtle is visible, make the head and shell a restrained secondary discovery, never a whole new continent.

Parts of this one site: Quiet Landing; Shell Garden; Nesting Shelf.

A3 | Westpine Forest

Master window: x 0-20%, y 50-75% | 1 named locations

Pines cover western ridges beside the lower river country. Clear working paths and old crossings skirt denser wildlife habitat. Woodcutters and walkers use the forest without treating every quiet clearing as a monster lair.

GH69 Pinewater Woods

Woodland | Master (11.2% across, 54.8% down) | Local (6, 31)

Position: on the northern side of this region.

Pine-shaded paths and a moss clearing follow the river's wooded western side. A usable open river edge contrasts with tighter trees farther inland.

Keep river access continuous. Webs or animal signs are tiny optional details, not a web-covered giant dungeon.

Parts of this one site: River Edge; Pine Trail; Moss Clearing.

B3 | Pinewater Vale

Master window: x 20-40%, y 50-75% | 4 named locations

Pinewater winds between wooded banks, farm tracks and the lanes around Pebbletown. Caravan staging and a remote alchemical cottage stand near the crossings. Water level, loose banks and ordinary animal activity give practical work to people who know the valley.

GH70 Pebbletown

Town | Master (35.0% across, 52.5% down) | Local (25, 40)

Position: in the northeastern part of this region.

A small southwestern town outside Glowhaven's walls, with a town green, market corner and modest homes along connecting lanes.

Keep it distinct from Pebblewick and Brookmeadow. It is a smaller settlement, with ordinary homes at the same physical scale as city homes.

Parts of this one site: Southwest Lane; Town Green; Market Corner.

GH71 Pinewater River

River corridor | Master (25.0% across, 57.5% down) | Local (-25, 20)

Position: in the northwestern part of this region.

A winding river runs through wooded valley banks, linking crossings, farms and Pebbletown's approaches. A ford, a river bend and a bank trail provide distinct usable stretches.

Its pin marks a corridor, not the river's entire shape or source. The Disused Pump House is one small riverside structure within this location, not an additional major landmark.

Parts of this one site: Brookmeadow Ford; River Bend; Pinebank Trail; Disused Pump House.

GH72 Caravan Outpost

Rural working stop | Master (37.0% across, 68.0% down) | Local (35, -22)

Position: in the southeastern part of this region.

A practical staging yard contains wagons, a few trade stalls and a roadside shelter beside the southern Pinewater route.

A modest working stop, not a new walled trading city. Wagons and sheds remain comparable in size to other ordinary buildings.

Parts of this one site: Wagon Yard; Trade Stalls; Roadside Shelter.

GH73 Thistlebank Alchemy Cottage

Rural cottage | Master (40.0% across, 74.2% down) | Local (50, -47)

Position: in the southeastern part of this region.

A low working cottage with a small herb plot, a warm copper workroom and a domestic front entrance. Modest planting beds support a household and practical alchemy.

One tiny rural premises at a region boundary. Do not enlarge it to a manor, greenhouse palace or industrial plant.

Parts of this one site: Cottage Door; Copper Workroom; Herb Plot.

C3 | Greenfield Farmlands

Master window: x 40-60%, y 50-75% | 2 named locations

Cultivated strips and scattered homesteads spread beyond Greyfield and the city's southern approaches. Irrigation branches lead toward the wider river country, while wooded margins conceal quieter ground. Farm roads carry produce, laborers and travelers.

GH74 Shadowspire

Small secluded tower | Master (59.2% across, 51.7% down) | Local (46, 43)

Position: in the northeastern part of this region.

A narrow secluded wizard's tower stands in a woodland pocket off the cultivated country's edge. A small outer clearing, brass-bound door and twisting trail establish its quiet approach.

It is a minor skyline accent compared with the Evertree and city institutions. The private portal and impossible household realm are inside or beyond it, not separate Glowhaven landmasses.

Parts of this one site: Shadowspire Forest; Twisting Trail; Outer Clearing; Threshold Hall; Upper Study; Cellar Gate.

GH75 Glowhaven Farmlands

Agricultural landscape | Master (45.4% across, 59.0% down) | Local (-23, 14)

Position: on the western side of this region.

Cultivated grain and vegetable strips, small homesteads and irrigation branches spread beyond Greyfield and the southern city roads. Farm tracks connect the plots to the wider countryside.

Fields, not buildings, occupy most of its footprint. Keep scattered roofs small and avoid filling the open farmland with ceremonial ruins.

Parts of this one site: South Fields; Farm Track; Irrigation Run; Brookmeadow Edge.

D3 | Seaward Bluffs

Master window: x 60-80%, y 50-75% | 2 named locations

Forested coastal bluffs give way to open meadows above a winding river. Starlark Abbey offers a settled presence inland, while the Seaward Overlook remains a quiet place to watch the sea. Exposed edges and weather demand sensible footing.

GH76 Seaward Overlook

Natural viewpoint | Master (76.4% across, 62.0% down) | Local (32, 2)

Position: on the eastern side of this region.

A grassy coastal cliff has a sheltered sitting place among wind-shaped trees and an exposed sea-facing ledge.

A terrain viewpoint, not an observation tower, monument or luxury lodge.

Parts of this one site: Sheltered Grass; Sea Ledge.

GH77 Starlark Abbey

Rural religious complex | Master (74.2% across, 71.5% down) | Local (21, -36)

Position: in the southeastern part of this region.

White stone and a small bell tower rise above the southern river country. A chapel, hospice and guest wing cluster around a pilgrim court, with a working kitchen garden.

A modest abbey devoted to Avelune, Lady of Returning Light. Keep it well below the city campuses in footprint; the hospitable grounds are not a second city.

Parts of this one site: Pilgrim Court; Chapel of Returning Light; Hospice; Kitchen Garden; Guest Wing.

E3 | Greenrush Marshes

Master window: x 80-100%, y 50-75% | 1 named locations

The river breaks into shallow tidal channels, reed beds and sandbars before meeting the eastern sea. Boatwrights, fishers and field workers use its changing margins. Dry-looking ground can flood quickly with an incoming tide.

GH78 Greenrush Estuary

Wetland and landing | Master (91.6% across, 67.8% down) | Local (8, -21)

Position: on the southern side of this region.

Shallow tidal channels, reed beds and pale sandbars spread where the river meets the eastern sea. A small skiff landing, raised reedwalk, boat supports and field shelter serve practical work.

This is a broad wetland with very few structures. Show actual open channels; do not replace the estuary with a large port city.

Parts of this one site: Skiff Landing; Reedwalk; Sandbar Crossing; Field Shelter.

A4 | Southglade Woods

Master window: x 0-20%, y 75-100% | 1 named locations

Southern woodland rises around an old stone lookout and scattered clearings. The outer tracks meet open grazing country; deeper folds of forest shelter wary animals. Old Southwatch can be reached without searching for a secret road.

GH79 Old Southwatch

Small lookout | Master (13.8% across, 90.0% down) | Local (19, -10)

Position: on the eastern side of this region.

An old stone lookout rises from a forested southern slope, with a root-crossed approach, a habitable lower room and a damaged upper walk.

A single modest tower or lookout remnant. It does not command an active garrison or justify another fortress town.

Parts of this one site: Forest Steps; Keeper's Room; Lookout Walk.

B4 | Longgrass Meadows

Master window: x 20-40%, y 75-100% | 0 named locations

Wide grasslands stretch between the western forest and the lower river. A few farmsteads and cart tracks leave large areas of open ground. Herding, gathering and ordinary rural travel occupy more of the landscape than ruins or fortifications.

No named location is configured here. Keep substantial open landscape with modest unnamed rural texture. This is intentional space, not a request for new towns, castles or dungeon landmarks.

C4 | Sunmead Plain

Master window: x 40-60%, y 75-100% | 0 named locations

Low hills, open pasture and scattered copses fill the southern plain. Thin dirt lanes link homesteads with the river crossings and neighboring meadows. Long sightlines let travelers notice weather, livestock and distant trouble before approaching.

No named location is configured here. Keep substantial open landscape with modest unnamed rural texture. This is intentional space, not a request for new towns, castles or dungeon landmarks.

D4 | Brookmeadow Downs

Master window: x 60-80%, y 75-100% | 2 named locations

Open downs and the westward village approaches surround a working windmill. A crossroads links the northern road, river bridge and farm lanes. It is settled countryside with room for travelers to pass without becoming part of every local dispute.

GH80 Longgrass Crossroads

Road junction | Master (64.2% across, 75.2% down) | Local (-29, 49)

Position: in the northwestern part of this region.

Three dirt roads meet in open downs near the river bridge and Brookmeadow approach. A worn roofed shelter, bench and cart pull-off mark the junction.

No paved highway or triumphal square. The pin sits almost on a northern region edge; draw continuous roads across that seam.

Parts of this one site: Way Shelter; Cart Verge; Riverward Track.

GH81 Wrenhill Windmill

Rural working building | Master (72.6% across, 90.2% down) | Local (13, -11)

Position: near the center of this region.

A working windmill turns above scattered grain plots on Brookmeadow's western approach. A small mill yard and wagon waiting space sit around its base.

Keep the mill a compact useful landmark, not an enormous wind-farm monument. Nearby houses retain the same ordinary building scale.

Parts of this one site: Mill Yard; Grinding Floor; Sail Gallery.

E4 | Brookmeadow Vale

Master window: x 80-100%, y 75-100% | 1 named locations

Brookmeadow’s houses, green and crop plots stand beside a river approach in the southeastern countryside. Farmers, mill customers and visiting workers share the lanes. The village remains a familiar local beginning within Glowhaven’s wider territory.

GH82 Brookmeadow

Village | Master (85.2% across, 84.5% down) | Local (-24, 12)

Position: on the western side of this region.

A small southeastern farming village gathers modest houses around a green, with crop plots, working yards, mill lanes and a riverward approach. Mihana's cottage is one ordinary home off Mill Lane.

This is the established rural starting village, not a new port. Its mill-lane name does not create a second giant windmill; Wrenhill Windmill is separately pinned to the west.

Parts of this one site: South Road; Village Green; Mill Lane; Mihana’s Cottage.

Position notes and interpretation boundaries

Positions are graphic anchors

The current world uses regionSize 100 and local coordinates from -50 to +50. Positive y is north. The master percentages below retain the whole 5-by-4 grid; they are not rescaled to the occupied pin cluster. They locate ground-level anchors and do not prescribe physical building size.

Names that sound similar

Pebbletown is southwest of the city; Pebblewick is the small eastern coastal town; Brookmeadow is far southeast. Clovermead is a northern farming settlement reached by boat. They are four different settlements. West and East Greyfield are the adjoining poor settlement outside the southern city walls.

Cross-border sites

Seabreeze Inn is in the Crescent Coast region but belongs to Pebblewick across the region boundary. Stargarden Manor is near the boundary beside the civic district. Thistlebank Alchemy Cottage is exactly on a tile edge, Hermit's hut is on a southern tile edge, and Longgrass Crossroads is almost on a northern edge. These are not duplicate sites or reasons to interrupt paths.

Broad descriptions versus pins

The Winding Lowlands is described as remote rural water country, but its current anchor is in the northwest region. Follow that anchor for this brief; keep the settlement tiny. The current Shadowspire pin is at the northeastern side of Greenfield Farmlands, not in the far southern corner. No old map composition overrides these current values.

Linear and areal places

The Grand Approach, Grand Ascent, Merchant's Row, Pinewater River, beaches, farms, woods and neighborhoods extend away from their pins. Design a continuous route or area that includes the anchor, rather than shrinking an entire river or district into a circular marker.

Separate realms

Wraith Island is the coastal landing and approach visible here; the prison interior has its own playable realm. Evertree portals go to distant regions rather than creating another academy portal on the landscape. Shadowspire's private realm lies beyond a cellar gate, not behind the tower as eight more exterior castles.

Living creatures

Nerathyl sleeps at the fixed Bluecoil reef; Mauruun is the passive giant turtle associated with Stillback; Ghorvath is a roaming kraken. Their habitats and deepwater routes matter. A static background is not proof of their current life, defeat or position, so optional sightings must not create duplicate bosses.

From the master to detailed crops

First image

Generate the complete landscape once. Check coast continuity, the three wall gates, the civic axis, all four campuses, major island separation, open southern country and the tiny building scale before spending effort on individual windows.

Split from one master

For square region crops, split five across and four down. Core bounds are A-E = 0-20, 20-40, 40-60, 60-80 and 80-100% across; rows 1-4 = 0-25, 25-50, 50-75 and 75-100% down. Use the original master for every crop rather than recursively cropping previous crops.

Supply context

When refining one part, provide the accepted whole master, the target crop and this PDF's matching region entry. Include adjacent edge context. An overlap around 10-15% of a tile's width is a starting production choice; explicitly record core and overlap bounds.

Rebuild detail

Reconstruct tiny buildings from their purpose, placement and footprint. Sharpen coherent roofs, entrances, bridges, courtyards and terrain forms. Do not turn blurred pixels into sacred architectural facts, move ground anchors, enlarge rural buildings, add unsolicited landmarks or change the camera.

Seams

Match roads, riverbanks, wall segments, coastlines and lighting across every shared strip. Generative refinement cannot guarantee pixel-identical edges. Align and blend in Photoshop using masks or soft erasing, preserving the intended shared geography.

Final pass

Check the assembled result at whole-map scale and at native crop scale. Tiny shops may remain subtle; they should not be inflated to make their identity readable in a thumbnail. High resolution means credible extra structure, not arbitrary texture or an automatically upscaled image.

Complete position index

The index is a numeric cross-check, not a request for printed labels. Percentages use the entire 5:4 master. Values are rounded to one decimal place for reading; the companion CSV retains full precision.

ID / tile	Canonical location	Across / down
GH01 / A1	The Winding Lowlands	13.8% / 13.0%
GH02 / A1	Greywatch Keep	3.8% / 17.8%
GH03 / A1	Moonwhisker Emporium	17.0% / 19.5%
GH04 / A1	Stargarden Manor	19.6% / 19.5%
GH05 / A1	The Emberfox Hot Spring	5.8% / 23.2%
GH06 / A1	Phoenix Wing Academy	15.0% / 23.2%
GH07 / B1	Evertree Base	24.6% / 14.3%
GH08 / B1	Sage's Spire	27.6% / 14.3%

Source and scope

Compiled from the current canonical world on 5 November 2026, following the Rebirth implementation. Only the twenty regions whose realm is Glowhaven and their eighty-two location records are catalogued. Source functions, surface descriptions and area membership guide the text. No old map raster, map URL, screenshot, other-world layout or character portrait is embedded. No gameplay or location record was changed.

Coordinates were checked against the Unofficial Voyage Wiki, Locations, x/y fields: https://wiki.unofficial.voyage/world/locations . The source uses regionSize 100 and north-positive y; this document converts them to left/top master percentages. Building-size budgets are separate illustrative art direction, not engine travel dimensions.
